

Registration Form
Demonstration of Innovative Water Conservation Process
Bristol-Myers Squibb
Devens, Massachusetts

Join TURI on **Thursday, May 21** or **Tuesday, June 2** from **9:00 to 12:00** at Bristol-Myers Squibb's new facility (being constructed now) to learn more about the innovative solutions they have implemented to address several technical and regulatory challenges associated with their use of water during the construction of their new facility in Devens.

The start-up schedule for the overall project was not synchronized to allow utilization of the wastewater pretreatment plant during commissioning activities. As a result, BMS was looking at the possibility of having to ship over 3.8 million gallons of pipe and tank cleaning water off site at a cost of at least 50 cents per gallon!

Come to this three-hour site tour and discussion to learn more about how the BMS team addressed this problem, and how they were able to minimize the volume of wastewater generated, and the cost of managing the wastewater.

Name: _____

Title: _____

Company Name: _____ SIC Code: _____

Address/City/State/Zip: _____

Phone: _____ Fax: _____

E-Mail: _____

Please place a check next to the date you would like to visit Bristol-Myers Squibb:

Thursday, May 21, 2009 or **Tuesday, June 2, 2009**

TUR Planners can earn 3 credits for the day, which may be used to apply to DEP for recertification.

Do you require CE Credit? Yes No

Please fax the completed registration form to: Fax 978-934-3050 – Attn: Brenda Wilson
Or mail to: Brenda Wilson, Toxics Use Reduction Institute – UMass Lowell, One University Avenue, Lowell, MA 01854
